Delamo GREEN CLEAN

Made from Recycled Rubber Tires and Plastic

The Delamo GREEN CLEAN tools are made in the United States,

The Delamo GREEN CLEAN product line is manufactured using a proprietary scrap tire rubber and plastic compound mix made from up to 100% post-consumer recycled content.

The Delamo GREEN CLEAN collection of products includes trash cans, wringer buckets, lobby dust pans and more.

The manufacturing process saves energy, minimizes greenhouse gasses, diverts tires and plastic from the landfills and results in the enhancement of environmental credentials.

The Delamo GREEN CLEAN product line is the only modular cleaning tool in the world using a blend of 85 to 100 percent post consumer recycled tire rubber and plastic and made entirely from regionally sourced materials.

35-Quart Heavy Duty Down Press Wringer Bucket Combo

Commercial grade industrial plastic molded from a post consumer proprietary rubber compound, which is engineered for durability and resilience. Attached 3" non-marking casters, comfort grip, form fit bail wire and easy to clean. Bucket features reinforced double wall rim and thick wall construction. Down press wringer has dual drive nylon gear mechanisms for heavy-duty performance and long life.

Mop Buckets can be nested!

Exclusive for Delamo 35-Qt Wringer Buckets

Delamo's 8022 Dirty Water Bucket works with our 35-Quart Wringer Combo. Traditional wringers force dirty water to mix with cleaning solution in the common bucket. This dirty water bucket installs under the wringer to collect and keep dirty water separated. The 8022 bucket includes a red lock to secure it into position and prevent spillover. The lock requires simple assembly to the wringer bucket rim*. Instructions included.

- Extends cleaning solution strength
- Improves floor quality and cleanliness
- Separates dirty water to reduce contamination
- Dirty Water Bucket locks in position and is easy to unlock for removal
- Requires less lifting to empty bucket
